

Dhia Ben Cheikh

Data Analyst - Data Analytics & BI

✉ dhiabencheikh09@gmail.com ☎ +216 52 268 826 🔗 /dhiabencheikh 📍 Tunis / Ariana, Tunisia

Data Analyst with 5 years of experience in analyzing and transforming complex datasets into actionable insights. Specialized in data pipeline automation, multi-source data analysis, and KPI development using Python and SQL. Experienced in building analytical dashboards, interpreting data, and delivering data-driven insights to support decision-making in institutional and organizational contexts.

PROFESSIONAL EXPERIENCE

Idaraty

Data Analyst (BI Analyst)

September 2021 - Present

- Automated data pipelines and reporting processes using Python and SQL, reducing report production time
- Analyzed public sector data and designed analytical visualizations (dashboards, charts, infographics) to support data interpretation and communication
- Collaborated with the Access to Information Authority to develop their first digital annual report (2022): data structuring, content coordination, and preparation of the official presentation
- Co-led a data visualization workshop at the Institute of Press and Information Sciences (IPSI), including hands-on training on data visualization and interpretation

Key Projects (within IDARATY)

Project : Arkam - Plateforme Implémentée par Idaraty en Collaboration avec L'INS

Data Engineer / Data Analyst (Analyste BI)

2022 - Present

Context : Development of a public data platform designed for journalists, citizens, and decision-makers to facilitate access to socio-economic indicators.

Technologies : Python, Javascript, API, SQL, Streamlit, Data visualisation.

Achievements :

- Collected and processed **3000+ datasets** from **80+ public data sources**
- Built automated data integration and transformation pipelines
- Designed visualizations and infographics for public communication
- Structured datasets for publication (charts, articles, downloadable data files)

Impact :

- Contributed to a communication campaign reaching **10K+ Subscribers**
- Generated **35K+ platform visits**

Project : Observatoire de l'Administration Digitale (Digital Administration Observatory)

Web Accessibility Analyst

2021 - Present

Context : Evaluation of public sector website performance and digital maturity.

Technologies : Python, CLI, Data Analysis, KPI

Achievements :

- Evaluated 500+ public websites in Tunisia
- Analyzed 100+ performance indicators (accessibility, performance, availability)
- Produced analytical reports for public institutions
- Contributed to customized reporting for public and private organizations

Impact :

- Supported decision-making for public institutions
- Contributed to improving digital public services quality

Project : Web Accessibility Evaluation – Government Project

Web Accessibility Analyst

Context : Evaluation of public administrations websites based on WCAG 2.1 accessibility standards.

Achievements :

- Conducted accessibility audits for 4 government websites
- Analyzed WCAG 2.1 compliance and identified issues
- Delivered detailed evaluation reports and technical recommendations

Impact :

- Contributed to improving accessibility of public digital services

Academic Projects

IDARATY / Observatoire de l'Administration Digitale (Digital Administration Observatory)

Automated Web Accessibility Analysis Framework

June 2025 - December 2025

Technologies : Python, Lighthouse CLI, Streamlit, GitHub, Linear, JSON, Data modeling, analytical dashboards..

Achievements:

- Creation of a framework for evaluating web accessibility.
- Designed a data model for accessibility evaluation
- Developed Python scripts for data collection, transformation, and analysis
- Built analytical dashboards and automated PDF reporting

Impact :

- Reduced manual checks by 50–60%
- Reduced reporting time by 70%
- Improved decision-making for accessibility experts

Trivaw (Startup)

Crowdfunding Platform with ETL Pipeline & Dashboard

March 2021 - June 2021

Technologies : MEAN Stack, Talend, Power BI

Achievements:

- Developed a crowdfunding platform
- Designed an ETL pipeline using Talend
- Modeled data for performance analysis
- Built Power BI dashboards to track campaign performance and user behavior

TECHNICAL SKILLS

Programming Languages : Python (ETL), R, SQL, Javascript (Data viz libraries).

Databases : MySQL, PostgreSQL, MongoDB, SQLite, NoSQL, PL/SQL, ORMs.

Tools : Power BI, Streamlit, Sketch, Draw.io, Mermaid.

Design Thinking & UX Design : Wireframe, Prototyping, Empathy, Process Optimization (BPMN), User-Centered Design (UCD).

Technical skills : ETL, data transformation, data analysis, data visualization, machine learning, deep learning, LLMs.

Personal skills : Creative and critical thinking, adaptability, problem-solving.

EDUCATION ET CERTIFICATIONS

EDUCATION

Engineering Degree in Computer Science – ERP & Business Intelligence (With Honors)

2021 - 2025

Private Higher School of Engineering and Technology (Evening classes)

Bachelor's Degree in Business Intelligence

2018 - 2021

Higher Institute of Management of Tunis

Baccalaureate in Computer Science

2014 - 2018

Habib Thameur High School, Bizerte

CERTIFICATIONS

BPM & BPMN

2023

PMI/TenStep
